

FCC

It is disturbing to learn of the intent to change the Indiana law pertaining to Telephone Pricavy. This is a system that is in place due to the want and desire of the voting public of this state. This law works in such a way that improves the quality of uninterrupted family life we all enjoy. Any introduction to change in this law would only be changing something the general public wants and business does not want. It really works well.

Thank You, Mark A. Blasky
